International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1, 1976

J. H. Cassis and L. A. Schmit, Jr.: On Implementation of the Extended Interior Penalty Function 3

R. S. Barsoum: On the Use of Isoparametric Finite Elements in Linear Fracture Mechanics 25

J. L. Batoz, A. Chattopadhyay and G. Dhatt: Finite Element Large Deflection Analysis of Shallow Shells 39

G. de Mey: Calculation of Eigenvalues of the Helmholtz Equation by an Integral Equation 59

B. Dawson and M. Davies: An Extended Matrix Transfer Method With an Automatic Root Search Capability 67

T. A. Weisshaar: Panel Flutter Optimization—A Refined Finite Element Approach . 77

Ch. Hirsch and G. Warzee: A Finite Element Method for the Axisymmetric Flow Computation in a Turbomachine 93

F. Kikuchi: Theory and Examples of Partial Approximation in the Finite Element Method 115

B. Gay: The Calculation of Branch Flows in a Directed Network 123

R. A. Feijoo and L. Bevilacqua: Sequential Interpolation Functions 133

T. Matsui and O. Matsuoka: A New Finite Element Scheme for Instability Analysis of Thin Shells 145

J. Gerin-Roze and P. Lesaint: Isoparametric Finite Element Methods for Two-Dimensional Transport Calculations 171

C. T. Crowe and D. E. Stock: A Computer Solution for Two-Dimensional Fluid-Particle Flows 185

J. Barlow: Inertia Loading in Finite Element Analysis of Structures Subject to Compound Motion 197

W. L. Oberkampf: Domain Mappings for the Numerical Solution of Partial Differential Equations 211

SHORT COMMUNICATIONS

M. J. O'Carroll: Diagonal Dominance and S.O.R. Performance with Skew Nets . . 225

P. F. Thomson: Enumeration of Networks 230

R. S. Barsoum: Discussion of Paper by R. D. Henshell and K. G. Shaw 235

Announcements 238

Issue No. 2, 1976

J. Barlow: Optimal Stress Locations in Finite Element Models 243

S. Akhtarzad and P. B. Johns: Transmission-Line Matrix Solution of Waveguides with *Dielectric Losses* 253

D. J. Allman: A *Simple Cubic Displacement Element for Plate Bending* 263

S. N. Patnaik and G. V. Sankaran: Optimum Design of *Stiffened Cylindrical Panels with* Constraint on the Frequency in the Presence of Initial Stresses 283

S. L. Crouch: Solution of Plane Elasticity Problems by the Displacement Discontinuity Method 301

F. Di Pasquantonio and A. Macchi: Mathematical Model and Boundary Conditions in Stress Analysis Relating to Steam Turbine Rotors, under Transient Operating Conditions 345

D. K. Brown: Multivariable Approach to the Finite Difference Solution of Elasto-Plastic Problems 361

P. Hood: Frontal Solution Program for Unsymmetric Matrices 379

Y. K. Cheung and T. P. Khatua: A Finite Element Solution Program for Large Structures 401

E-M. Salonen: An Iterative Penalty Function Method in Structural Analysis 413

M. N. Bismarck-Nasr: Finite Element Method Applied to the Supersonic Flutter of Circular Cylindrical Shells 423

M. Kawahara, N. Yoshimura, K. Nakagawa and H. Ohsaka: Steady and Unsteady Finite Element Analysis of Incompressible Viscous Fluid 437

R. B. Deshpande, B. K. Shankaramurthy and C. P. Revankar: Comparison of Curve Fitting Techniques 457

SHORT COMMUNICATIONS

H. H. Wang: An ADI Procedure Suitable for Virtual Storage Systems 465

D. S. Watkins: A Comment on Gopalacharyulu's 24 Node Element 471

S. Gopalacharyulu: Author's Reply to the Discussion by Watkins 472

L. Meirovitch: A Further Discussion of a Paper by K. K. Gupta 474

O. Ersoy: Some New Rational Approximations to the Error Function 475

W. Squire: An Efficient Iterative Method for Numerical Evaluation of Integrals over a Semi-Infinite Range 478

Announcements 484

Book Reviews 487

Issue No. 3, 1976

D. C. Look and S. E. McKinney: Numerical Quadrature and Two-Dimensional Radiative Heat Transfer 491

Y. Yokoo, T. Nakamura and K. Uetani: The Incremental Perturbation Method for Large Displacement Analysis of Elastic-Plastic Structures 503

J. D. Boadway: Transformation of Elliptic Partial Differential Equations for Solving Two-Dimensional Boundary Value Problems in Fluid Flow 527

D. K. Majumder and W. A. Thornton: Design of Efficient Stiffened Shells of Revolution 535

R. S. Barsoum: A Degenerate Solid Element for Linear Fracture Analysis of Plate Bending and General Shells 551

S. F. Shen and W. Habashi: Local Linearization of the Finite Element Method and its Applications to Compressible Flows 565

T. Belytschko, R. L. Chiapetta and H. D. Bartel: Efficient Large Scale Non-Linear Transient Analysis by Finite Elements 579

S. Valliappan, P. Boonlaulohr and I. K. Lee: Non-Linear Analysis for Anisotropic Materials 597

W. Squire: The Solution of Ill-Conditioned Linear Systems Arising from Fredholm Equations of the First Kind by Steepest Descents and Conjugate Gradients . . . 607

F. D. K. Roberts: An Algorithm for Minimal Degree Linear Chebyshev Approximation on a Discrete Set 619

K. K. Gupta: On a Numerical Solution of the Supersonic Panel Flutter Eigenproblem 637

R. B. Corr and A. Jennings: A Simultaneous Iteration Algorithm for Symmetric Eigenvalue Problems 647

P. R. Benson and E. Hinton: A Thick Finite Strip Solution for Static, Free Vibration and Stability Problems 665

M. P. Cleary: Continuously Distributed Dislocation Model for Shear-Bands in Softening Materials 679

SHORT COMMUNICATIONS

W. Squire: Numerical Evaluation of a Class of Singular Double Integrals by Symmetric Pairing 703

W. Squire: A Quadrature Method for Finite Intervals 708

G. N. Vanderplaats: Structural Optimization via a Design Space Hierarchy . . . 713

Letter to the Editor 718

Announcement 719

Issue No. 4, 1976

J. E. Pitoniak, J. R. Shanebrook and A. C. Lemmo: An Iterative Method for the Design of Symmetrical Joukowski Airfoils of Specified Chord and Maximum Thickness . . 723
N. Gass and B. Tabarrok: Large Deformation Analysis of Plates and Cylindrical Shells by a Mixed Finite Element Method 731
J. S. Arora and E. J. Haug, Jr.: Efficient Optimal Design of Structures by Generalized Steepest Descent Programming 747
R. C. Batra, M. Levinson and E. Betz: Rubber Covered Rolls—The Thermo-viscoelastic Problem. A Finite Element Solution 767
G. Akhras and G. Dhatt: An Automatic Node Relabelling Scheme for Minimizing a Matrix or Network Bandwidth 787
H. H. King: A Poisson Equation Solver for Rectangular or Annular Regions . . . 799
P. P. Lynn and K. Alani: Efficient Least Squares Finite Elements for Two-Dimensional Laminar Boundary Layer Analysis 809
G. E. Bell and J. Crank: A Simple Finite-Difference Modification for Improving Accuracy near a Corner in Heat Flow Problems 827
K. Mastanaiah: On the Numerical Solution of Phase Change Problems in Transient Non-linear Heat Conduction 833
T. J. R. Hughes: Reduction Scheme for Some Structural Eigenvalue Problems by a Variational Theorem 845
R. N. Allan, G. H. Grigg and M. R. G. Al-Shakarchi: Numerical Techniques in Probabilistic Load Flow Problems 853
S. Y. Barony and H. Tottenham: The Analysis of Rotational Shells Using a Curved Ring Element and the Mixed Variational Formulation 861
M. Narayanan and N. J. Shankar: A Numerical Model for the Simulation of Two-Dimensional Convective-Dispersion in Shallow Estuaries 873
W. L. Wood: On The Finite Element Solution of an Exterior Boundary Value Problem 885
W. G. Gray and G. F. Pinder: On the Relationship Between the Finite Element and Finite Difference Methods 893
D. S. Watkins: On the Construction of Conforming Rectangular Plate Elements . . 925
Yoshiyuki Yamamoto and Hideomi Ohtsubo: Subspace Iteration Accelerated by Using Chebyshev Polynomials for Eigenvalue Problem with Symmetric Matrices . . . 935

SHORT COMMUNICATIONS

R. D. Cook: Artificial Adjustment of Element Stiffness, With Particular Reference to Plate Bending 945
S. S. Russell: Non-Linear Programming—Gradient Projection via Orthogonalization 950
J. L. Meek and G. Beer: Contour Plotting of Data Using Isoparametric Element Representation 954
R. Scott: A Hexagonal Finite Element With One Degree-of-Freedom per Hexagon . 958
M. K. Jain, R. Ahuja and S. Bhattacharyya: Difference Schemes for Second Order Hyperbolic Equations 960
J. G. Wills: Remarks on a Method for Solving Second Order Differential Equations 964
P. Bartholomew: Comment on Hybrid Finite Elements 968
K. K. Gupta: Author's Reply to a Recent Discussion 974
Book Reviews 975

Issue No. 5, 1976

M. Lal and E. Moore: An Iterative Technique for Fitting Exponentials 979

J. C. Lachat and J. O. Watson: Effective Numerical Treatment of Boundary Integral Equations: A Formulation for Three-Dimensional Elastostatics 991

E. S. Kristensen and N. F. Madsen: On the Optimum Shape of Fillets in Plates Subjected to Multiple In-Plane Loading Cases 1007

E. D. Eason: A Review of Least-Squares Methods for Solving Partial Differential Equations 1021

W. A. Gruver and N. H. Engersbach: A Variable Metric Algorithm for Constrained Minimization Based on an Augmented Lagrangian 1047

G. E. Zinsmeister and S. S. Pan: A Modification of the Monte Carlo Method for Steady Heat Conduction Problems 1057

C. D. Mote, Jr. and R. C. Young: Derivatives and their Error Bounds in Second Order Problems by Finite Element 1065

U. Salaam and R. S. Sandhu: A Finite Element Galerkin Formulation and its Numerical Performance 1077

N. S. Khot, V. B. Venkayya and L. Berke: Optimum Structural Design with Stability Constraints 1097

E. Y. Rodin: A New Method of Integration over Polynomial Finite Element Boundaries 1115

A. K. Chugh and S. B. Biggers: Stiffness Matrix for a Non-Prismatic Beam-Column Element 1125

B. E. Larock and C. Taylor: Computing Three-Dimensional Free Surface Flows . . 1143

C. C. Mei and H. S. Chen: A Hybrid Element Method for Steady Linearized Free-Surface Flows 1153

SHORT COMMUNICATIONS

M. P. Kamat, G. W. Swift and D. E. Killian: Beam-Column Element for Inelastic Analysis 1177

B. M. R. Irons and T. K. Hellen: On Reduced Integration in Solid Isoparametric Elements When Used in Shells with Membrane Modes 1179

N. Muthiyala and G. V. Rao: Finite Element Analysis of Lifting of an Elastic Plate from a Rigid Foundation 1183

R. Luus: A Discussion on Optimization of an Alkylation Process 1187

R. S. Dembo and M. Avriel: A Note on Optimization of an Alkylation Process . . 1191

R. D. Henshell: Differences Between Isoparametric Assumptions and True Circles . 1193

N. N. Abdelmalek: A Computer Program for the Chebyshev Solution of Over-determined Systems of Linear Equations 1197

S. S. Sastry: Numerical Solution of Fredholm Integral Equations with a Logarithmic Singularity 1202

Announcements 1208

Issue No. 6, 1976

R. L. Taylor, P. J. Beresford and E. L. Wilson: A Non-Conforming Element for Stress Analysis 1211
